LacoInvoice

Stop Copy-Pasting Marketplace Excel Files to Invoice One Order.

Drop your order Excel. Get every 7% VAT tax invoice. Connect directly to your ERP.

Laco Invoice turns raw marketplace order and tax invoice spreadsheets into ready-to-send 7% VAT tax invoices, receipts, and ERP-ready accounting vouchers — all in one place.

- **Smart Excel import.** Drop your order and tax invoice spreadsheets from TikTok Shop, Shopee, Lazada, or POS — the system extracts, validates, and structures all data automatically.
- **1-Click Thai tax invoices.** Automated sequential numbering (`INV-YYYYMM-XXXXXX`), 7% VAT breakdown, and 13-digit Tax ID validation.
- **Bulk PDF ZIP export.** Download an entire month's invoices in a single packaged archive with one click.
- **ERP GL voucher bridge.** Export pre-balanced journal entries directly into Express ERP, SAP, and Business Central without ERP lag.

SAY IT OUT LOUD

"You're downloading messy order spreadsheets from three different seller portals, copy-pasting customer tax IDs into Excel, manually typing invoices, and still scrambling to reconcile with ERP at month-end. Laco Invoice replaces all of that — just upload your Excel sheets, and it turns every order into a compliant tax invoice and audit-ready ERP voucher."
