MOSONIC

Content for every listing —
every channel your buyers are on.

The Simple Way for Online Sellers to Create Content

Sales Pitch for E-Commerce Sellers

mosonic.me

What is Mosonic?

Mosonic is an AI tool that creates content for online sellers. Tell it about your brand and products once, and it writes text, makes photos, and makes video for every listing. You check it over, then it publishes everywhere your buyers shop — including RedNote, a platform most tools can't reach.

> *"Mosonic turns basic product info into ready-to-post text, photos, and video, then publishes it to Facebook, Instagram, YouTube, LinkedIn, TikTok, and RedNote — all from one screen."*

The Problem

Every new listing means new content — and today, that's a scramble.

- **Too many tools, too little time.** One app for captions, another for photos, another for video — and you explain your brand to each one, every single time.
- **Buyers you can't reach.** RedNote brings in real sales from overseas buyers, but almost no content tool can post there for you.
- **You don't know what content costs.** There's no way to tell what a listing's content costs — until the bill shows up.
- **Content can't keep up.** New products and flash sales move faster than a small team can photograph, write about, and post.

The Mosonic Solution

Fill in your info once, and it powers everything Mosonic creates. You can publish to six channels, including RedNote — a platform other tools can't touch.

- **One form, every listing.** Enter your product and brand info once — Mosonic uses it for everything it creates.
- **Simple, visual steps.** Build exactly what a new listing needs — no typing complicated instructions to the AI.
- **One login, every channel.** Connect once, then publish everywhere your buyers shop.

Key Features

Feature	What It Does	Why It Matters
Brand Info Setup	Reads your brand info — from text, a file, or a website link — and turns it into a simple brand guide.	No blank page to stare at for every new listing.
Easy Content Builder	Simple, visual steps for creating text, photos, and video.	No tech skills needed, even with lots of products to manage.
Consistent Product Photos	Combines a layout and a look into one photo that matches your brand.	Every listing looks consistent — no expensive reshoots.
Two Kinds of Video	A polished product video, or a video with an AI presenter showing off your product.	One tool does both — no camera crew, no extra vendor.

Feature	What It Does	Why It Matters
Edit & Approve, Your Way	Change it, redo it, or approve it — or let it go straight to publish.	Full control over every listing, on your schedule.
Publish Everywhere at Once	Facebook, Instagram, YouTube, LinkedIn, TikTok, and RedNote — connect once.	One login instead of six, everywhere your store shows up.
Cost Per Listing	See what each piece of content costs, as soon as it's made.	No surprise bills — you know what each listing costs.
Trend-Based Content Ideas	Mosonic watches the news and drafts timely post ideas for you.	Jump on trends fast, without anyone watching the news all day.

Reach Every Channel Your Buyers Are On

Post your products everywhere buyers already look — all from one place.

Facebook	**Instagram**	**YouTube**
LinkedIn	**TikTok**	**RedNote (Xiaohongshu)**

RedNote is a platform most content tools can't reach — a real advantage if you sell to Southeast Asia or overseas. Mosonic also connects to WhatsApp, Telegram, Viber, LINE, and WeChat, so you can chat with customers there too.

Why Sellers Choose Mosonic

- **One brand, everywhere.** Your listings look and sound the same, no matter which channel.
- **Go where others can't.** Mosonic works with RedNote — most tools only cover Facebook, Instagram, and TikTok.
- **Works in three languages.** Full support for English, Thai, and Chinese, so you can sell across borders.

Who Mosonic Is For

Solo Sellers & Small Stores

You sell a few products on one or two marketplaces, and want professional-looking content without hiring a photographer or video person every time.

Growing Stores

You're adding new products and new sales channels at the same time, and don't have time to explain each new listing to five different apps.

Multi-Store Sellers & Agencies

You manage content for several stores or seller accounts, and need everything to look consistent while keeping track of what's spent.

Sales Pitch

Elevator Pitch

Mosonic turns basic product info into ready-to-post text, photos, and video, then publishes it to Facebook, Instagram, YouTube, LinkedIn, TikTok, and RedNote — all in one place.

Key Selling Points

- Enter your info once — Mosonic uses it for every listing.
- Publish straight to RedNote — most tools can't do this at all.
- Two kinds of video, made the same easy way.
- Six channels, one login.

Say It Out Loud

"You're using one app for product photos, another for video, and still posting new listings to RedNote yourself. Mosonic replaces all of that — one simple setup, publishing everywhere your buyers already are."

Ready to Make Content the Easy Way?

Just bring your product info. We'll show you how easy it is to create text, photos, and video — and publish it everywhere your buyers already shop and chat.
