MOSONIC

Stop Juggling Five Apps to Sell on One.

One product brief. Every listing. Every channel — including RedNote, where nobody else can follow you.

Mosonic turns basic product info into ready-to-post text, photos, and video, then publishes it to Facebook, Instagram, YouTube, LinkedIn, TikTok, and RedNote — all in one place.

- **Enter your info once. Use it for every listing.**
- **Publish straight to RedNote — most tools can't touch it.**
- **Two kinds of video, same easy process.**
- **Six channels, one login.**

SAY IT OUT LOUD

"You're using one app for product photos, another for video, and still posting new listings to RedNote yourself. Mosonic replaces all of that — one simple setup, publishing everywhere your buyers already are."
