LacoInvoice

Every marketplace order,
invoice ready.

Marketplace invoicing for growing online businesses

Marketing Overview & Pricing Guide

laco-invoice

MARKETPLACE OPERATIONS, MADE CLEAR

What is Laco Invoice?

Laco Invoice brings marketplace orders, tax invoices, receipts, and finance handoffs into one organised workspace. Operations teams keep orders current; finance teams receive clean, consistent documents and voucher-ready information.

The problem

Marketplace sellers often move between seller portals, spreadsheets, manual document files, and finance requests. The result is repeated work, missing context, and slower month-end preparation.

Orders are scattered Teams search multiple marketplaces and files before they can act.	**Documents take time** Issuing tax invoices and receipts one by one creates avoidable admin.	**Finance starts late** PDFs and voucher information arrive without a consistent handoff.

The Laco Invoice approach

Connect stores, manage orders in one view, issue documents with consistent VAT treatment, and export the records finance needs. Laco Invoice does not need to depend on an ERP response during everyday invoice work.

- One connected workspace for marketplace order and document work.
- Tax invoices and receipts with sequential document numbering and 7% VAT support.
- PDF download and bulk ZIP export for a cleaner handoff to customers, finance, and auditors.
- Voucher workflow preparation that can be reviewed before CSV, Excel, or later API exchange with ERP.

CORE PRODUCT CAPABILITIES

Less chasing. More done.

A practical daily workflow for marketplace operations and finance.

01

See every order in one place

Keep marketplace orders searchable, filterable, and ready for action in one central workspace.

02

Create documents in moments

Generate tax invoices and receipts with consistent numbering and VAT already applied.

03

Keep finance moving

Export individual PDFs or a bulk ZIP, then prepare information for ERP voucher workflows.

Built for marketplace teams

Laco Invoice is designed around the day-to-day needs of sellers operating across TikTok Shop, Shopee, Lazada, and Amazon. Marketplace availability and configuration should be confirmed for each customer rollout.

TikTok Shop Bring completed orders into a clearer invoice workflow.	**Shopee** Keep document preparation aligned with marketplace activity.	**Lazada** Reduce manual file handling at month end.	**Amazon** Support a unified view as channels grow.

A SIMPLE FLOW

From order to ready-to-send document.

Laco Invoice keeps the work moving without adding another complicated process.

01	**Connect your store**	Link a marketplace storefront and bring orders into Laco Invoice.
02	**Keep orders current**	Run a sync when you need it, with automatic syncing available for a more current order view.
03	**Issue the document**	Open an order and create a tax invoice or receipt PDF.
04	**Share or archive**	Print, download, or export individual documents and bulk ZIP packages.
05	**Keep finance moving**	Use organised invoice records as a starting point for ERP voucher processing.

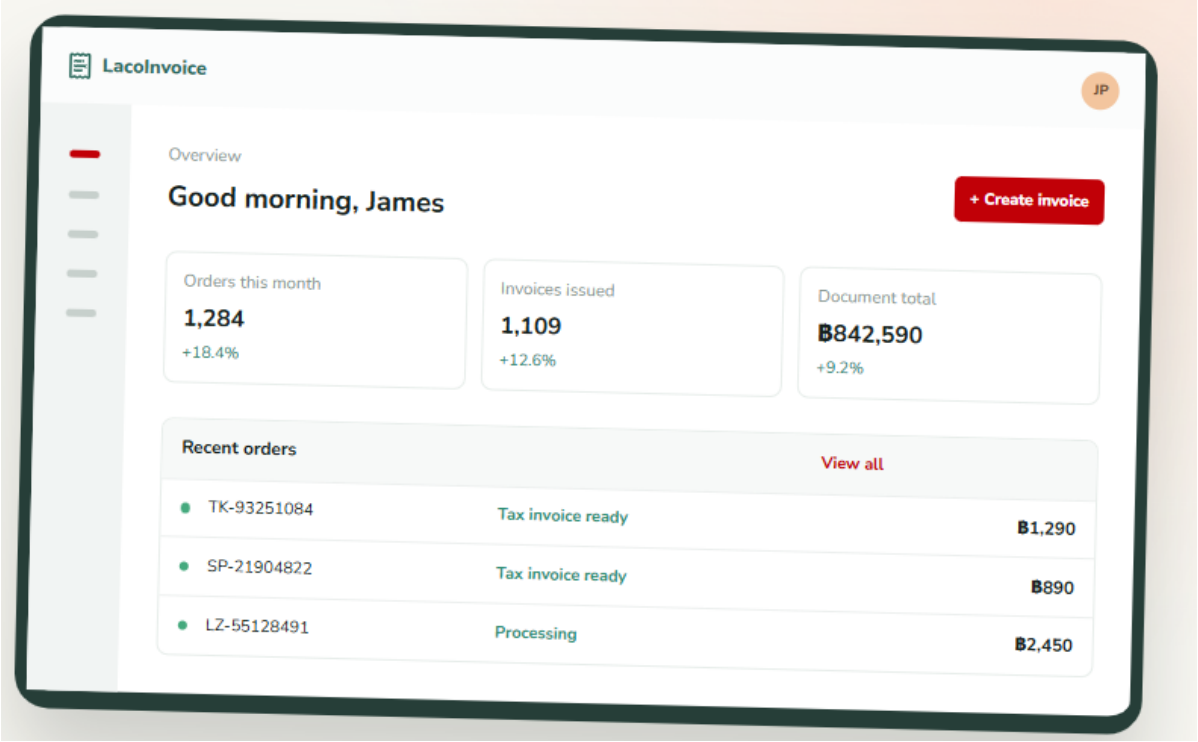

A cleaner ERP handoff

ERP master data such as items, vendors, and account codes can be synchronised into Laco Invoice by CSV or Excel first, then by scheduled API sync later. Voucher preparation reads local synced data, so finance does not wait for ERP while working.

ONE CLEAR WORKSPACE

Designed for confidence at a glance.

A shared operational view gives sales operations and finance the same starting point.

Who Laco Invoice is for

Thai and Southeast Asia marketplace sellers, growing multi-channel teams, and finance functions that want a more organised path from sales activity to invoices, receipts, and voucher preparation.

Operations teams Spend less time searching portals and preparing documents.	**Finance teams** Receive clearer records, PDFs, and voucher-ready data.	**Growing sellers** Start with one store and expand capacity when needed.

Sales pitch

Laco Invoice helps marketplace sellers move from completed order to professional tax invoice or receipt in one connected workflow. Your team can search orders, create documents, export PDFs in bulk, and give finance a cleaner start for voucher processing.

STRAIGHTFORWARD PRICING

A plan that grows with your business.

Proposed public pricing for review. Prices are in Thai baht, exclude VAT, and are billed monthly unless stated otherwise.

Starter One growing store	Growth Multi-channel teams	Scale Established operations	Enterprise Tailored workflows
